

# PFOA/PFOS: CLEAN UP BEST PRACTICES

Last Modified on 02/19/2020 3:39 pm EST

Since the USEPA proposed health advisory levels for PFOS and PFOA in May 2016, per and polyfluoroalkyl substances (PFASs) have become a public issue. The discussion will focus on developments in the past 3 ½ years, lessons learned and provide some insights on best practices and emerging solutions.
