

# ANNOUNCING THE NAVY INSTALLATION ENERGY RESILIENCE STRATEGY

Last Modified on 02/24/2020 12:43 pm EST

The Department of the Navy has made energy resilience an mission readiness imperative at every naval installation around the world. The Secretary of Navy recently signed and issued to the fleets and forces, an Installation Energy Resilience Strategy that provides leaders and energy managers with clear goals to achieve energy resiliency as a critical component of mission readiness at every Navy and Marine Corps installation. Learn more about the Navy's approach and how industry and community partnerships are part of energy strategy for resilience.
