

MCAS MIRAMAR: A 5G COLLABORATIVE MARKET FOR DEVELOPING THE "INSTALLATION NEXT"

Last Modified on 02/24/2020 1:06 pm EST

In conjunction with the USMC, Verizon and Naval Information Warfare Center - Pacific have finalized a 4 year Collaborative Research and Development Agreement to establish a 5G Living Lab on MCAS Miramar. This will be a key foundation in the Protection, Resilience and Mobility Vectors of the Marine Corps' Installation Next efforts. To help support this, Congress recently approved \$5M for establishing and evaluating the capabilities that will be enabled by 5G on MCAS Miramar, such as Unmanned Vehicles, Drones, Micro-Grid capabilities, and Digital Fortress pilots.
