

PARTNERSHIPS FOR MISSION ASSURANCE

Last Modified on 11/05/2021 1:11 pm EDT

The December 2020 Army Installation Strategy declares that partnerships and data analytics will be the two pillars upon which the strategy is built. The partnerships for future installation success must focus on building resilience in both the community's and the installation's critical infrastructure, which often overlap. This panel will focus on the cyber threats to critical infrastructure and highlight partnerships and techniques a remote Army installation and a Marine Corps air station in a metropolitan area have developed to ensure their mission resilience.
