

BLACK START STRESS TESTS – LESSONS LEARNED FROM FORT KNOX AND FORT HUNTER LIGGETT EXERCISES

Last Modified on 11/02/2022 12:15 pm EDT

The owners of critical infrastructure serving today's military installations and the communities around them must prepare for attacks by peer/near-peer adversaries and mother nature. Fort Knox and Fort Hunter Liggett have executed a wide range of energy initiatives and partnerships to harden and strengthen their Installation's energy independence (Net Zero) and resilience. This discussion will address the coordination and planning necessary for a successful black start exercise and the major lessons learned from the exercises.
