

# DEVELOPING THE SMART MILITARY BASE OF THE FUTURE

Last Modified on 11/02/2022 12:41 pm EDT

This session will dive into the efforts underway to put in place AT&T FirstNet Public Safety systems on military installations. Working with a wide group of stakeholders, this effort is deploying Passive Telecom Infrastructure elements, macro towers, small cells, dark fiber and in-building systems on Navy, Marine, Air Force, Space Force and Army bases across the country. Attendees will learn how these efforts are progressing and what it will mean for installations and communities.
