SHIELDS UP! HARDENING CRITICAL INFRASTRUCTURE IN A CONNECTED WORLD

Last Modified on 11/02/2022 12:44 pm EDT

In recent years, adversaries have demonstrated an increased capability to penetrate and cripple the control systems of our critical infrastructure, impacting mission readiness. Military installations have increasingly become dependent on services provided by vendors from outside the base. These dependencies contribute to vulnerabilities that impact installation mission readiness.

This panel will dive explore DoD-specific directives and guidelines issued this year focused on infrastructure cybersecurity and needed action at all levels, and what they will mean for installations and communities.
